

EDITORIAL LETTER

Special issue “Sustainable Architecture and Urban Environment” Revista Internacional de Contaminación Ambiental

This special issue “Sustainable Architecture and Urban Environment” is published with selected research articles of the 2020 International Conference on Climate Change, Green Energy and Environmental Sustainability (CCGEES 2020) held in Haikou, Hainan Province, P.R. China during 18-20 December 2020. CCGEES 2020 aims to bring together scientists, engineers and scholars for sharing of their latest research findings and experiences in dealing with climate change, sustainable design and development in today’s fast changing world. The special issue covers a wide range of research topics dealt with in a multi-disciplinary and multi-dimensional approaches. Research areas include but not limited to: smart mobility, social innovation, sustainable and resilient buildings, social impacts and cities resiliency, energy transition, financing sustainability, energy efficiency, clean energy deployment, and ICT, smart grid and intelligent infrastructure. Sustainable design, sustainable development and sustainable urbanization is more crucial to a developing country like China. With rapid economic growth and urbanization, how to develop an economy without compromising the environment, how to create a built environment in harmony with the human beings and improve people’s living quality, have caught the attention of the Chinese governments at different levels, and research community at large. A variety of research topics are addressed in this special issue, such as the use of recycled building materials, user-friendly urban planning and design, water quality modelling, environmental information management, green building design, etc. The research findings and discussions are expected to advance the theory and practice in sustainable development. Thanks to the contributions of the authors who disseminate their top-notch research works to benefit the research community and policy makers in the field. The authors responded swiftly to the editor and publisher on their requests to make improvement to the manuscripts and address the questions from the reviewers with their best efforts.

Special thanks are also extended to the managing editor Claudio M. Amescua García of the Revista Internacional de Contaminación Ambiental Journal, who dedicated tremendous efforts to the editing and publishing of the special issue with Professionalism.

We wish the readers enjoy the reading of the rigorously selected research articles in the special issue and benefit from the research works presented by the authors.
